BECOME A

**CERTIFIED INFORMATION  
SYSTEMS AUDITOR  
(CISA)**

## In a World Full of Auditors, be a CISA

Validate your expertise and get the leverage you need to move up in your career. With ISACA's Certified Information Systems Auditor (CISA) certification, you can do just that. CISA is world-renowned as the standard of achievement for those who audit, control, monitor and assess an organization's information technology and business systems.

## Position yourself for success with the in-demand CISA certification.

Since its inception in 1978, more than 150,000 people have obtained ISACA®'s Certified Information Systems Auditor® (CISA®) certification. Join this community of elite professionals and get the recognition you deserve.

The first step to becoming CISA certified is to take and pass the CISA certification exam. The exam consists of 150 questions covering 5 job practice domains and tests your understanding of the knowledge and practical abilities an expert professional brings to the real-life job practice as it relates to information systems. Your ability to pass the exam will amount to substantial proof of your own expertise in these practical work-related domains:

**1 Auditing Information Systems—** providing audit services in accordance with standards to assist organizations in protecting and controlling information systems. Domain 1 affirms your credibility to offer conclusions on the state of an organization's IS/IT security, risk and control solutions.

**2 Governance and Management of IT—** delivering assurance that the necessary leadership, structures and processes are in place to achieve organizational objectives and support strategy.

Domain 2 confirms to stakeholders your abilities to identify critical issues and recommend enterprise-specific practices to support and safeguard the governance of information and related technologies.

**3 Information Systems Acquisition, Development and Implementation—** providing assurance that the practices in these areas will meet strategies and objectives.

**4 Information Systems Operations, Maintenance and Service Management—** providing assurance that processes also meet strategies and objectives.

Domains 3 and 4 offer proof not only of your competency in IT controls, but also your understanding of how IT relates to business.

## 5 Protection of Information Assets—

providing assurance that policies, standards, procedures and controls ensure the confidentiality, integrity and availability of information assets.

Cybersecurity now touches virtually every information systems role, and understanding its principles, best practices and pitfalls is a major focus within Domain 5.

## See why CISA is a lifelong symbol of knowledge and expertise.

In today's complex, fast-paced business environment, information has become the most valuable currency for enterprises around the globe.

Information systems professionals play vital roles in leveraging the value and assuring the security and integrity of data that drives business. CISA is recognized the world over as proof of competency and experience in

providing assurance that critical business assets are secured and available.

Hiring managers look for it. Some business and governmental agency roles require it. Organizations and professionals worldwide consider CISA “the gold standard” for IS/IT certifications.

- The American National Standards Institute (ANSI) has accredited the CISA certification program under ISO/IEC 17024:2012.

- CISA named among the 10 highest paying certifications of 2020 by PC Mag.

- CRN placed CISA on their list of “The 11 Hottest Cybersecurity Certifications In 2020”.

- The U.S. Department of Defense (DoD) 8570.01-M “Information Assurance Workforce Improvement Program” named ISACA’s CISA certification among those approved for US DoD information assurance (IA) professionals.

## Build a world class technically proficient IT privacy team

CISA certification instantly declares your team’s expertise in building and implementing privacy solutions aligned with organizational needs and goals.

CISA provides a valid and reliable means for enterprises to identify technologists who are competent in incorporating privacy by design into technology platforms, products and processes, communicating with legal professionals, and keeping the organization compliant efficiently and cost effectively. CISA proves your team has the technical skills and knowledge it takes to assess, build and implement a comprehensive privacy solution while enhancing business value, customer insights and trust—ultimately improving your organization's image.

Get your team certified and ready to tackle the challenges of the ever-changing privacy landscape.

## Is CISA Right for You?

CISA certification is foundational to a successful IT career. If you are an entry-level to mid-career professional, CISA can showcase your expertise and assert your ability to apply a risk-based approach to planning, executing and reporting on audit engagements. Gain instant credibility in your interactions with internal stakeholders, regulators, external auditors, and customers.

## A CISA CERTIFICATION

- Confirms your knowledge and experience
- Quantifies and markets your expertise
- Demonstrates that you have gained and maintained the level of knowledge required to meet the dynamic challenges of a modern enterprise
- Is globally recognized as the mark of excellence for the IS audit professional
- Combines the achievement of passing a comprehensive exam with recognition of work and educational experience, providing you with credibility in the marketplace.
- Increases your value to your organization
- Gives you a competitive advantage over peers when seeking job growth
- Helps you achieve a high professional standard through ISACA's requirements for continuing education and ethical conduct

## WHY ISACA BELGIUM?

ISACA Belgium is a non-profit organization and is part of ISACA International.
