Dear ISACA Belgium Chapter,

On behalf of ISACA, I want to extend my warmest congratulations to each of you on the celebration of your 40th anniversary. Reaching this milestone is an extraordinary achievement and a testament to your dedication, leadership and impact within the global ISACA community. The Belgium Chapter has long been a vital part of our organization—helping to shape conversations around governance, cybersecurity, audit and risk, while building a strong and connected professional community at the heart of Europe.

Over these decades, both ISACA globally and the Belgium Chapter locally have demonstrated an ability to evolve alongside the professions we serve. Our fields have never stood still—but today, that pace of change has accelerated dramatically. As technology, regulation and risk continue to converge, professionals are being asked to take on broader and more complex responsibilities. ISACA's role has always been to support you in that evolution—providing the knowledge, credentials, frameworks, and community you need to navigate change with confidence and credibility.

Today, we are entering the next phase of that evolution, driven by artificial intelligence. AI is not only expanding what organizations can do—it is fundamentally reshaping how decisions are made, how risks are understood and how accountability is defined. As we see across our global research and member experience, the challenge is not simply adoption, but governance—ensuring that AI is deployed responsibly, securely and with clear oversight. This is where ISACA and our chapters, including Belgium, play a critical role: helping translate rapid technological change into practical, defensible professional practices.

The ISACA Belgium Chapter holds a uniquely important position in this next chapter. Located at the center of Europe's policy, regulatory, and technology ecosystem, you serve as both a local community and a strategic bridge to broader regional and global conversations. Your engagement with professionals, institutions and stakeholders helps strengthen not only your members, but also ISACA's collective voice and influence in advancing digital trust and helping our members thrive in their careers.

As we look ahead, our shared opportunity is clear. Together, we can help define what excellence looks like in AI governance, cybersecurity and digital trust, ensuring that ISACA professionals are not just reacting to change, but leading it. ISACA will continue to invest in being your career partner at every stage, and chapters like yours will remain the foundation of that effort, providing the connections, leadership opportunities, and local insight that make our global community so powerful.

Thank you for everything you have done over the past 40 years—and for the leadership you will continue to provide in the years ahead. We are proud to celebrate this milestone with you and are even more excited about what we will build together next.

With sincere congratulations,
